SARTHAK SINHA

GENERATIVE AI ENGINEER | LLM SYSTEMS & AI ARCHITECTURE

Phone: +91 9289484363
Email: sarthaksinha5088@gmail.com
Location: Sector 71, Noida, UP, India

PROFESSIONAL SUMMARY

Innovative and results-oriented **Generative AI Engineer & Systems Developer** with strong hands-on expertise in developing, deploying, and optimizing Large Language Model (LLM) workflows, local AI model serving (Ollama/Transformers), Retrieval-Augmented Generation (RAG), and advanced prompt engineering architectures. Proven software engineering track record scaling high-performance distribution platforms to **1.1M+ downloads**. Skilled in integrating Generative AI pipelines, fine-tuning task-specific models, optimizing inference latency, and building secure automated CI/CD deployment pipelines.

TECHNICAL SKILLS & COMPETENCIES

Generative AI & LLMs	LLM Integration (GPT-4, Claude, LLaMA, Mistral), Retrieval-Augmented Generation (RAG), Prompt Engineering, Fine-tuning, Vector Embeddings & Databases (FAISS, ChromaDB), Ollama Serving
Frameworks & Libraries	LangChain, LlamaIndex, Hugging Face Transformers, PyTorch, Python, REST APIs, FastAPIs
Cloud, DevOps & CI/CD	GitHub Actions CI/CD, Docker Containerization, Linux Administration, GPU Inference Optimization, Model Deployment & API Monitoring
Software Engineering	Backend Architecture, Systems Programming, Performance Audits, Cybersecurity & Safe AI Data Handling

WORK EXPERIENCE & AI PROJECTS

Lead Software Architect & AI Systems Engineer

Orion Store & Distributed Systems — **2022 – Present**

- Architected and scaled the **Orion Store** platform to surpass **1,100,000+ (1.1M+) total downloads**, maintaining high-availability backend distribution and fault-tolerant infrastructure.
- Engineered automated data pipelines and continuous deployment workflows using GitHub Actions to maintain rapid release stability.
- Implemented local LLM inference engines and custom prompt-driven tooling using Ollama and Hugging Face pipelines for automated task generation and code analysis.
- Developed modular CLI tools and performance-critical routines (Scyther Cleaner) optimizing system memory, I/O efficiency, and automated system auditing.

IT Executive & Systems Administrator

Lloyd Group of Institutions — **Present**

- Manage high-density network infrastructure, enterprise computing environments, and centralized administrative systems.
- Deploy and maintain local compute servers, virtual environments, and secure access policies for data-intensive workflows.
- Enforce cybersecurity controls, endpoint data protection, and automated maintenance protocols to eliminate network downtime.

Gen AI & Machine Learning Workshop Lead

Emerging Tech & AI Literacy Initiatives — **2023 – Present**

- Conducted hands-on technical workshops covering Generative AI fundamentals, LLM architecture, prompt engineering techniques, and practical AI application development.
- Built interactive demo sandboxes integrating open-source LLMs and vector search to showcase real-time RAG pipelines and semantic search implementations.
- Mentored developers and students on AI safety, model hallucinations, and ethical implementation of automated AI systems.

IT Support Specialist & Technical Operations Lead

College Sahayata — **2023 – 2024**

- Managed core technical operations, internal networking, and automated database backups for digital student administration.
- Assisted with digital portal administration and streamlined data ingestion pipelines to enhance system response times.

EDUCATION & ACADEMIC BACKGROUND

Bachelor of Computer Applications (BCA) — 2022 – 2025
Institute of Professional Excellence and Management (IPEM)

Senior Secondary Education (Class XII) — Completed 2022
Dashmesh Public School

Secondary Education (Class X) — Completed 2020
Dashmesh Public School

CERTIFICATIONS & CONTINUOUS LEARNING

- AI & Machine Learning Foundations
- Cybersecurity & Network Defense Fundamentals
- Windows Server & Enterprise Desktop Administration
