SARTHAK SINHA

AI Orchestrator & Builder | Generative AI Systems

Noida, India • +91 9289484363 • sarthaksinha5088@gmail.com
github.com/RookieEnough • rookieenough.github.io/My-Portfolio/

PROFESSIONAL SUMMARY

AI Orchestrator & Builder operating production AI systems end to end. I run **Orion Store**, an Android app distribution platform with **1.1M+ downloads**, and the fully automated build pipeline behind it. Deep hands-on expertise in LLM systems operation (Ollama, Hugging Face), retrieval-augmented generation, advanced prompt engineering, and AI automation. I ship reliable AI systems using AI-native tooling, orchestration, and prompt engineering.

CORE COMPETENCIES

LLM Systems Operation: Ollama local model serving, Hugging Face pipelines, open-weight models (Llama, Mistral, Gemma), GPU inference

RAG & Knowledge Systems: Vector embeddings, FAISS, ChromaDB, LlamaIndex, semantic search pipelines

Prompt Engineering: Agent workflows, structured outputs, evaluation-driven iteration, prompt-driven automation

AI Automation & DevOps: GitHub Actions CI/CD, Docker containerization, Linux administration, automated QA gates

Applied Generative AI: Multi-model orchestration (GPT-4, Claude, Llama, Mistral), LangChain, local-first AI architectures

EXPERIENCE

Founder & Operator — Orion Store

2022 – Present | 1.1M+ downloads served

- Built and operate an Android app distribution platform serving **1.1M+ downloads**, owning everything from the automated build pipeline to the storefront.
- Operate **Morphe-AutoBuilds**: an automated patching pipeline producing 100+ apps with patch-compatibility enforcement and fail-loud build guards.
- Engineered multi-mirror download resilience and GitLab-based release hosting to keep every build available.
- Run daily app-submission review and user support operations at scale.

Open-Source Contributor — De-Vanced

2024 – Present

- Authored and merged the **Facebook 580 patch set (PR #150)** into the dev branch.
- Collaborate with maintainers on patch compatibility, build verification, and issue triage.

IT Executive & Systems Administrator — Lloyd College, Noida

2023 – Present

- Manage high-density network infrastructure and enterprise computing environments.
- Deploy and maintain local compute servers, virtualization, and secure access policies.
- Enforce endpoint protection and automated maintenance protocols, eliminating network downtime.

SELECTED PROJECTS

Local LLM Operations — Run Ollama-based local inference and RAG pipelines powering task automation and support workflows, keeping all data on-device.

Scyther Cleaner — System utility optimizing memory usage and I/O performance across managed machines.

EDUCATION

Bachelor of Computer Applications (BCA), 2022 – 2025 — Institute of Professional Excellence and Management (IPEM), Ghaziabad

Senior Secondary (Class XII), 2022 — Dashmesh Public School, New Delhi

Secondary (Class X), 2020 — Dashmesh Public School, New Delhi

CERTIFICATIONS

- AI & Machine Learning Foundations
- Cybersecurity & Network Defense Fundamentals
- Windows Server & Enterprise Desktop Administration
