PROFESSIONAL SUMMARY

GenAI-focused systems builder who ships practical products, automation pipelines, and developer tools using LLMs and AI-assisted development. Founder and operator of Orion Store — an open-source Android app distribution platform with 1.26M+ downloads, a 1,100+ app catalog, and automated pipelines that rebuild 96 apps daily. Combines hands-on LLM tooling and local inference with production CI/CD, systems administration, and an active open-source community.

EXPERIENCE

Founder & Systems Builder
2022 – Present

Orion Store · Open-source Android app distribution platform

- Built and operate an open-source app store serving **1.26M+ downloads** with a catalog of **1,100+ apps** and **2.9K+** GitHub stars on the core repository.
- Designed a serverless distribution architecture on public GitHub, GitLab, and Codeberg releases, using repository-based data and mirrors instead of a conventional app-store backend.
- Engineered GitHub Actions pipelines that patch, sign, validate, and publish **96 app builds daily** with multi-source hosting, mirror handling, and automated website deployment.
- Own full project lifecycle: releases, documentation, submissions, issue triage, and user support.

GenAI Systems & Automation
2023 – Present

Independent Projects · Local LLMs, RAG, AI Agents

- Run local LLM inference with Ollama and Hugging Face; cover model selection, privacy-aware workflows, and AI-assisted task pipelines.
- Build retrieval and semantic-search prototypes using RAG, embeddings, FAISS/ChromaDB, LangChain, and LlamaIndex.
- Use AI coding agents (Claude, Cursor, Codex) to plan, implement, review, and troubleshoot features, validating changes through builds and iterative testing.

IT Executive & Systems Administrator
2023 – Present

Lloyd College · Noida / Greater Noida

- Support enterprise computing and high-density network environments, including endpoint security and access policies.
- Deploy and maintain local compute systems, virtual environments, and routine operational processes; troubleshoot infrastructure to keep day-to-day technology reliable.

Open-Source Contributor
2024 – Present

De-Vanced · Morphe patches for Android

- Contributed the Facebook 580 patch set (PR #150); collaborate on patch compatibility, build verification, and issue triage.

IT Support Specialist
2023 – 2024

College Sahayata · Technology operations

- Supported internal technology operations, networking, and automated database backup routines.

CORE SKILLS

LLMs & AI Tools	Claude, ChatGPT/GPT, Gemini, OpenAI Codex, Claude Code, Cursor, Google Antigravity
Local Models & Inference	Ollama, Hugging Face, Llama, Mistral · Local model serving · Privacy-aware workflows
GenAI Workflows	Prompt engineering · Structured outputs · Multi-step workflows · AI-assisted development · Model comparison
RAG & Retrieval	RAG · Embeddings · Semantic search · FAISS · ChromaDB · LangChain · LlamaIndex
Automation & Delivery	GitHub Actions · CI/CD · Release validation · Build pipelines · GitLab · GitHub
Product & Infrastructure	React · TypeScript · Vite · Capacitor · Android delivery · Linux · Docker · Cloudflare Pages · Windows & Network admin

SELECTED PROJECTS

Orion Store
TypeScript · React · GitHub Actions · Serverless · ★ 2.9K
Open-source Android app distribution platform with automated builds, release mirroring, and a serverless, no-tracking architecture.

De-Vanced
Kotlin · Morphe patches · ★ 1K
Patch-set repository for Android apps, including the Facebook 580 patch set, with build verification and issue triage.

Morphe-AutoBuilds
Python · GitHub Actions · ★ 936

Clean, automated workflow that builds Morphe APKs every 24 hours with no manual steps.

Orion-Data
Python · Repository-based data · ★ 51
Data warehouse behind Orion Store: the repository-based catalog layer that enables the serverless design.

Personal Portfolio
React · TypeScript · Vite · Three.js · GSAP · rookiez.is-a.dev
Interactive 3D portfolio built with React Three Fiber and deployed to Cloudflare Pages via GitHub Actions.

Scyther Cleaner
Windows utility · ★ 30
Lightweight Windows utility focused on cleanup and maintenance workflows, clearing junk files from the system drive.

OPEN-SOURCE FOOTPRINT

7	4.9K+	185+	915	800+
Public Repos	GitHub Stars	Forks	GitHub Followers	X Followers

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA)
Institute of Professional Excellence and Management (IPEM), Ghaziabad
2022 – 2025

Certifications

- AI & Machine Learning Foundations
- Cybersecurity & Network Defense Fundamentals
- Windows Server & Enterprise Desktop Administration
- Google Cybersecurity Professional Certificate
- Cisco Introduction to Cybersecurity
